- The International Traffic in Arms Regulations (ITAR) supersedes any Commerce Department jurisdiction that may exist, so Gen II is in the same export category as Gen III - it requires a license to export. - It is the Buyer's responsibility to request and obtain export licenses for the export of the subject items, and to ensure that the requirements of all applicable laws, regulations and administrative policies are met.
- Generation 4, autogated/filmless technology is absolutely not available for export.
